SUMMARY

I'm a master's student in Software Product Management & Business with a Computer Engineering background and experience in agile digital projects. I bridge the gap between users and tech teams, leading pilots, gathering feedback, and driving rapid product improvements. Comfortable in modern startup settings, I wear many hats to deliver user focused solutions and am excited to help bring AIDY Home's AI avatar companion to its first users.

PROFESSIONAL EXPERIENCE

Project Manager

Orca Clan Tech, Kpk Pakistan | 09/2023 – 10/2024

- Managed multiple agile product development projects from concept to delivery, coordinating with designers, developers, and stakeholders.
- Led pilot implementations, collected user feedback, and collaborated with the technical teams.
- Facilitated user-focused design and testing sessions to improve usability and customer satisfaction.

Technical Operations Coordinator

Orca Clan Tech, Kpk Pakistan | 02/2023 – 07/2023

- Provided technical support and operational oversight for digital platforms.
- Collaborated with the product team to resolve usability issues and implement feature improvements based on user needs.
- Tracked and reported key performance metrics to leadership, ensuring transparency and alignment.

NETWORK EXPERIENCE

IEEE Student Branch, CUI Islamabad | 02/2018 – 01/2021

- Led and managed events and member activities.
- Organized multiple technical and non-technical workshop.
- Collaborated with other organizations to drive engagement, visibility and networking.
